

Press release**Eiffage begins works on BLACK in Clichy (France),
a 50,000 sqm ecological urban campus for AXA IM Alts and Redman**

Eiffage, through its subsidiaries Eiffage Construction and Goyer, recently began works on the BLACK office building project in Clichy, northwest Paris, on behalf of AXA IM Alts and Redman. The facility size will be almost 50,000 sqm and will accommodate 4,100 people. Located on a former industrial site, this commercial complex will contribute to the city's urban redevelopment and aims to become one of France's largest low-carbon buildings.

Originally secured by Eiffage in 2019, excluding technical packages, the project has been almost a year in the redesign to take account of the new uses and flexibility required due to the increase in remote working, along with new environmental criteria.

The brainchild of architects Emmanuel Combarel Dominique Marrec Architectes, this six-storey project plus basement level comprises two separate structures: a 31,520 sqm "garden" building and a 17,710 sqm "courtyard" building. It will include an auditorium, concierge service and three commercial premises.

The whole first-floor offices will all be 100% reconfigurable into meeting rooms, and huge collaborative spaces will be developed on the upper levels. Exterior spaces accessible to building users will complete the project.

BLACK has strong environmental ambitions and will use a low-carbon construction method with industrial pre-walls, metal substructure, and a façade, realised by Goyer, French leader in facade construction, with stabilised timber cladding following YakiSugi's ancestral Japanese technique. Two gardens covering a total of 10,000 sqm will help create urban cool islands.

The project is targeting numerous labels and certifications: HQE® New – Outstanding Level, BREEAM Excellent, BBCA, E+/C- Level E1/C1, Biosourced Building Label, BiodiverCity, Osmoz, R2S and Wiredscore.

Works for this large-scale project are expected to take 26 months, with delivery scheduled for late 2023. It will take 300,000 working hours, including 10,000 hours of access-to-employment work and require the use of five cranes.

**About Eiffage**

Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised around the following business lines: construction, real estate and urban development, civil engineering, metal, roads, energy and concessions. Thanks to the experience of more than 72,000 employees, Eiffage generated revenue of €16.3 billion in 2020, of which 26.5% was outside France.

About Eiffage Construction

Eiffage Construction incorporates the complementary business lines of urban planning, property development, construction, facility management and maintenance. The company is strongly established in France with nine regional divisions, and also in Belgium, Luxembourg, Switzerland and Poland. Eiffage Construction generated revenue of €3.7 billion in 2020.

About Goyer

Goyer has been making facades since 1931 and has unique expertise in the design and installation of aluminium facades and glass exterior joinery. An Eiffage subsidiary, Goyer is a market leader in France with a modern and efficient manufacturing base enabling it to operate across the entire value chain for its products.
